

## Propellants and Special Products / LPG

With the AERON® brand, SCHARR CPC produces and markets modern foaming, blowing, and cooling agents based on the hydrocarbons propane, n-butane, and isobutane for use in cosmetic and technical sprays, cooling units and for foaming plastics. From design to production, from consultation to sales services – we put our heart and soul into looking after our customers.

As a strong partner of nationally and internationally operating refinery and utility companies, SCHARR CPC handles trading, storing, and distributing LPG using ships, trucks and rail tank cars.

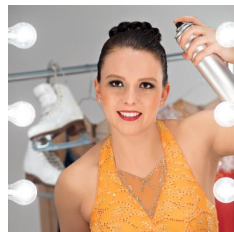

### **Benefit from our experience in the field of pentanes**

The AERON® expanding agents marketed by SCHARR CPC do not only meet the major environmental and economic requirements for expanding agents in the manufacture of plastic foams. In fact, AERON® expanding agents have been in use, tried and tested for years in the PU, PE and EPS industry and available in sufficient industry-scale quantities.

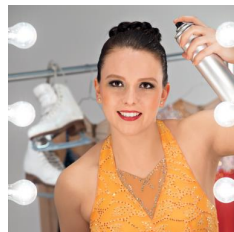

Our warehouse in Basel, ideally located in the triangle Germany, Switzerland and France, with direct highway access, the well-dimensioned storage tank sizes, a separate pipeline system and staff trained to handle pentanes ensure that every customer will be served with the best possible service.

### **Top quality – from start to finish...**

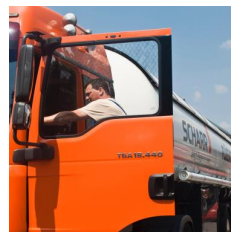

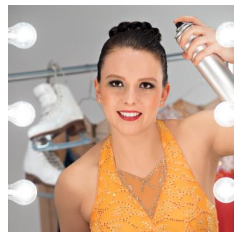

SCHARR CPC GmbH is one of the leading companies in the field of purified hydrocarbons, used as propellants and refrigerants. Our tri-modal storage facility on the river Rhine, in Krefeld/ Germany has direct access to the local motorway- and rail-network, enabling the realisation of a comprehensive logistics-concept and placing us in position to meet almost any customer requirement. Moreover, we guarantee that the long-standing business relationships we have with our carrier-companies and the experience and knowledge of our own trained employees, in dealing with aerosols, make it possible to satisfy every customer demand in a reliable and timely fashion.

### Full Speed Ahead

Propane, Butane and mixtures of those are main sources of energy with various applications. SCHARR CPC offers next to a wide range of LPG products, special gases as well as petrochemical products. The equivalent service for those products is obvious.

## Our Claim

### Service in Bestform:

The team at SCHARR CPC offers longstanding experience in the different product fields. Based on it as well as a trustful collaboration with our partners, we are in a position to offer our clients flexibility and the greatest possible supply availability.

### Available from a single source:

At SCHARR CPC , our product offering extends far beyond purely manufacturing and supplying. We remain at your disposal with advice on all aspects of storage, safety, training and the provision of important contact details.

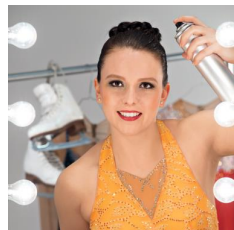

### Quality Prevails:

At SCHARR CPC , our quality management system is certified in accordance with ISO 9001. All processes from raw-material input, through to the finished product and from the receipt of orders, through to their final delivery are subject to constant monitoring and control.

Our central focus is on quality assurance and providing customer satisfaction. We are more than happy to demonstrate these two attributes when audited by national and international customers.

### Safety:

Products, offered by SCHARR CPC , are subject to hazardous goods law. It is therefore essential to observe the necessary safety-precautions when storing, handling or transporting such materials. We have the necessary knowledge and experience in dealing with all eventualities and can thus ensure our customers of the highest level of safety.
